

PRESS RELEASE -

For Immediate Release: 9:00 AM EDT August 3, 2004

HOME PC SOLUTIONS ACQUIRED BY EMERALD DATA NETWORKS

Woodstock, GA - Randall Fleenor (shown right), owner and sole proprietor of Home PC Solutions, announced that after months of extensive negotiations with Emerald Data Networks, Inc. they have finally reached an agreement for the acquisition/merger of his company.

Home PC Solutions, a personal computer services and consulting company, has a client base of both residential and commercial customers throughout the Atlanta area. The terms of the agreement, by which Fleenor will become a partner at Emerald Data Networks, involves the transfer of only his commercial business clients. "I'll continue to work with the larger clients in my new role in the combined company," said Fleenor. "Also, I wanted to refer my residential customers to someone I know and trust. I called Cliff Rhodenizer because I used to work for him a few years ago, and I know he has high standards." Fleenor added, "I value the relationships I've built with all of my

customers, large and small. It just didn't seem right to sell a list of names to someone and walk away".

Cliff Rhodenizer Jr. (shown left), President of Rhodenizer IT, Inc., met with Randall Fleenor on Monday to discuss the transition. "I admire Randy for not offering his list of customer contacts up for sale", said Rhodenizer. "By referring them to contact me now, Randy can rest assured that they will still receive competent and professional service from someone who has the same values and business ethics". Rhodenizer added, "Besides, we'll stay in touch so we can ensure a smooth transition."

Rhodenizer IT, Inc. is an Information technology services provider based in Roswell, GA. With nearly 20 years of experience, Cliff Rhodenizer holds several industry certifications and is the author of numerous published articles. He has created IT Policy and Procedure Manuals for small companies and is currently working on his own book, "Outsourcing IT - Giving Away the Bride", due out next January.
